Introduction

An aptitude test is, generally, any test designed to measure potential for achievement.

The word *aptitude* is sometimes misused to mean ‘ability’ or ‘achievement’; however, there is a subtle difference between the three words *aptitude*, *ability* and *achievement*, which can be distinguished as follows:

- *aptitude* – how quickly or easily you will be able to learn in the future;
- *ability* – what you are able to demonstrate in the present;
- *achievement* – what you have accomplished in the past.

There are nine different types of aptitude, which may be summarized as follows:

- *General learning*: learning and understanding, reasoning and making judgements. Example: how well we achieve at school.
- *Verbal aptitude*: general lexical skills – understanding words and using them effectively.
- *Numerical aptitude*: general mathematical skills – working with numbers quickly and accurately.
- *Spatial aptitude*: understanding geometric forms, and the understanding and identification of patterns and their

meaning. Example: understanding how to construct a flat-pack piece of furniture from a set of instructions.

- *Form perception*: inspecting and perceiving details in objects, and making visual comparisons between shapes. Examples: studying an object under a microscope, and quality inspection of goods.
- *Clerical perception*: reading, analysing and obtaining details from written data or tabulated material. Examples: proof-reading, analysing reports and understanding graphs.
- *Motor coordination*: eye and hand coordination, and making quick and accurate rapid movement responses. Examples: actually being able to assemble the flat-pack piece of furniture once you have understood how it should be done, being able to operate a computer keyboard quickly and accurately, and sporting skills.
- *Finger dexterity*: manipulating small objects quickly and accurately. Examples: playing a musical instrument, and sewing.
- *Manual dexterity*: the skill of being able to work with your hands. Examples: painting and decorating, building things and operating machinery.

In the case of most aptitude tests there is usually a set time limit, which must be strictly adhered to in order for the test to be valid, and there is usually an average score that has been standardized in comparison with the scores of a group of people who have taken the same test.

The tests that follow in Chapters 1, 2 and 3 are divided into three main sections: verbal aptitude, spatial aptitude and numerical aptitude.

Chapter 4 consists of four separate IQ tests, each consisting of a mixture of verbal questions, numerical questions and questions involving diagrammatic representation.

Note: Because they have been newly compiled for this book, the tests have not been standardized in comparison to scores obtained by other groups. Nevertheless there is a guide to assessing your performance at the end of each test and, because several of the tests relate to specific aptitudes, the results will give you the opportunity to identify your own particular strengths and weaknesses.

[This page is intentionally left blank]

Verbal aptitude

The definition of ‘verbal aptitude’ is the capacity for general lexical skills – the understanding of words and the ability to use them effectively.

People who possess a high level of verbal skills often excel in fields such as writing (author, journalist, editor, critic), teaching (language, drama), the legal profession (judge, barrister, lawyer) and personnel work (advocate, human resources, counsellor) and as actors, psychologists, interpreters and interviewers.

Mastery of words is seen by many as having in one’s possession the ability to produce order out of chaos. Because of this it is argued that command of vocabulary is an essential measure of intelligence, with the result that verbal tests are widely used in IQ testing.

Verbal reasoning tests are designed to measure basic verbal aptitude. Typically such tests include spelling, grammar, word meanings, completing sentences, synonyms (words that are the same or similar in meaning to each other) and antonyms (words that are opposite in meaning to each other).

The exercises that follow test basic verbal aptitude in a number of disciplines, including synonyms, antonyms, analogy, odd one out and verbal comprehension.

For each test a performance assessment is provided. The time limit that is specified for completing each test should not be exceeded; otherwise your score will be invalidated.

Test one: General verbal aptitude test

This test is a miscellaneous selection of 30 questions designed to measure language use or comprehension, and your ability to adapt to different types of question.

You have 60 minutes in which to answer the 30 questions.

You should read the instructions to each question carefully before attempting it.

1. Which word in brackets is most similar in meaning to the word in capitals?

ERSTWHILE (fallacious, deviant, previous, honest, candid)

2. Which word in brackets is most similar in meaning to the word in capitals?

PEDESTRIAN (plinth, ordinary, slow, erudite, rueful)

3. Which word in brackets is most similar in meaning to the word in capitals?

TENABLE (believable, alluring, steadfast, delicate, speculative)

4. Which two words are closest in meaning?

rubicund, recurrent, allied, frequent, routine, tolerable

5. Which two words are closest in meaning?

strange, formless, hectic, irregular, pallid, angry

6. Which two words are closest in meaning?

conciliatory, propitious, inspired, fortunate, compatible,
routine

7. Which word in brackets is most opposite in meaning to the word in capitals?

SOOTHE (augment, inflame, ignore, depress, execute)

8. Which word in brackets is most opposite in meaning to the word in capitals?

PROSCRIBE (demolish, stifle, change, unify, allow)

9. Which word in brackets is most opposite in meaning to the word in capitals?

GOAD (resolve, halt, dissuade, warn, retract)

10. Which two words are most opposite in meaning?

bright, exemplary, meteoric, fundamental, gradual, level

11. Which two words are most opposite in meaning?

superlative, traumatic, subversive, relaxing, crucial,
uncommitted

12. Which two words are most opposite in meaning?

ancient, recant, evoke, maintain, dissent, stand

13. Which two words are most opposite in meaning?

susceptible, clandestine, extreme, credulous, banal, immune

14. Which is the odd one out?

inch, metre, litre, foot, kilometre

15. Which is the odd one out?

adieu, salutation, sayonara, farewell, ciao

16. Which is the odd one out?

appendix, prologue, supplement, addendum, postscript

17. Which is the odd one out?

immutable, eternal, transitory, imperishable, indelible

18. Which is the odd one out?

corporation, entrepreneur, business, firm, conglomerate

19. Which is the odd one out?

auburn, chestnut, walnut, carmine, hazel

20. amplify is to augment as aggravate is to: elevate, maximize, exacerbate, inflate, proliferate
-

21. Identify two words (one from each set of brackets) that form a connection (analogy), thereby relating to the words in capitals in the same way.

FLORA (vegetation, life, animals)

FAUNA (animals, plants, flowers)

22. Identify two words (one from each set of brackets) that form a connection (analogy), thereby relating to the words in capitals in the same way.

APHELION (planet, furthest, distance)

PERIHELION (nearest, sun, orbit)

23. Identify two words (one from each set of brackets) that form a connection (analogy), thereby relating to the words in capitals in the same way.

SQUARE (polygon, rectangle, rhombus)

CIRCLE (sphere, diameter, ellipse)

24. Identify two words (one from each set of brackets) that form a connection (analogy), thereby relating to the words in capitals in the same way.

SPRING (autumn, flower, bud)

SUMMER (tree, leaf, July)

25. identical is to indistinguishable as comparable is to
(congruous, corresponding, analogous, homogeneous,
symmetry)
-
26. Which two words that sound alike, but are spelled differently,
mean:
require / to work or press into a mass
-
27. Which word means the same as the definitions on either side
of the brackets?
condition of extreme hardship () to promise or
pledge
-
28. What word can be placed in the brackets so that it forms a
word or phrase when tacked on to the end of the first word,
and another word or phrase when placed in front of the
second word?
double () bar
-
29. Which 3 of the 10 three-letter bits can be combined to
produce a word meaning deserving of respect or high regard?
ide, ima, ria, end, est, ent, ard, atu, ble, ile
-
30. Which 3 of the 10 three-letter bits can be combined to
produce a word meaning an authoritative rule?
ina, tas, ord, ula, ate, ian, nce, cel, ion, pet
-

Test two: Word meanings test

This test measures your ability to distinguish between words that are frequently confused or misused in correspondence and conversation.

In each question you are provided with two definitions and two words. You must place each word alongside its correct definition.

You have 30 minutes in which to solve the 30 questions.

1. a type of coarse cloth _____

to solicit votes _____

canvas, canvass

2. noun: one who depends _____

adjective: depending on _____

dependent, dependant

3. in that place _____

belonging to them _____

their, there

4. impartial, unbiased _____

lacking interest _____

disinterested, uninterested

5. unbroken, connected _____

frequent, repeated _____

continual, continuous

12 IQ and aptitude tests

6. verb: to give an opinion _____

noun: opinion given _____

advice, advise

7. how much? _____

how many? _____

amount, number

8. verb: to predict _____

noun: prediction _____

prophecy, prophesy

9. very small or unimportant _____

careless _____

negligent, negligible

10. unwilling, reluctant _____

dislike intensely _____

loath, loathe

11. making less dark _____

discharge of electricity in atmosphere _____

lightening, lightning

12. spirit of fortitude or endurance _____

of good conduct _____

moral, morale

13. verb: to bring about; noun: result _____
verb: to act on, to influence _____
affect, effect
14. every two years _____
twice a year _____
bi-annual, biennial
15. notice or point out likenesses _____
notice or point out differences _____
compare, contrast
16. body of water or electricity _____
small berry _____
currant, current
17. to hint _____
to deduce or conclude _____
imply, infer
18. stated in detail _____
implied but not expressed _____
explicit, implicit
19. impending, close at hand _____
abiding in, inherent _____
immanent, imminent

20. staff employed _____

individual, private _____

personal, personnel

21. smaller in amount _____

smaller in number _____

less, fewer

22. to inform _____

to evaluate _____

appraise, apprise

23. that which completes _____

commendation, praise _____

complement, compliment

24. faulty, incomplete _____

falling short _____

defective, deficient

25. to turn aside, divert _____

to take away from _____

detract, distract

26. more than ordinary _____

for a special occasion _____

especially, specially

27. naïve, innocent _____

cleverly contrived _____

ingenious, ingenuous

28. related to a judge, impartial _____

sensible, prudent _____

judicial, judicious

29. examples _____

priority _____

precedence, precedents

30. work with another _____

confirm, support a statement _____

corroborate, collaborate

Test three: Grammar and comprehension

This test is a miscellaneous selection of 15 questions designed to measure language use or comprehension, and your ability to adapt to different types of question, including several involving the use of grammar and punctuation.

You have 90 minutes in which to complete the 15 questions.

1. As a craftsman he was extremely _____ at creating artistic designs of metalwork and he was able to _____ his son's suggestion to _____ several of these creations, which enables them to be put to better use.

Insert the three words below into their correct positions in the above sentence.

adopt, adapt, adept

2. The _____ had a _____ to remain _____ as the train left the platform.

Which is the only one of the following combinations that contains the correct three words to be inserted into the above sentence?

- a. superintendant, tendency, stationary
- b. superintendent, tendancy, stationary
- c. superintendant, tendency, stationery
- d. superintendent, tendency, stationary
- e. superintendent, tendency, stationery
- f. superintendant, tendancy, stationery

Answer

☐

3. Which one of the following sentences is grammatically correct?
- a. Although it's true that the football team's fame has spread far and wide, it's performance has been a great disappointment to the manager throughout the current season.
 - b. Although it's true that the football team's fame has spread far and wide, its performance has been a great disappointment to the manager throughout the current season.
 - c. Although it's true that the football teams' fame has spread far and wide, its performance has been a great disappointment to the manager throughout the current season.
 - d. Although its true that the football teams' fame has spread far and wide, it's performance has been a great disappointment to the manager throughout the current season.
 - e. Although it's true that the football teams' fame has spread far and wide, it's performance has been a great disappointment to the manager throughout the current season.

Answer

☐

4. Which one of the following sentences is grammatically correct?
- a. 'Whose that young child?' exclaimed the lady, whose plants the child had just trampled down.
 - b. 'Who's that young child?' exclaimed the lady, whose plants the child had just trampled down.
 - c. 'Who's that young child?' exclaimed the lady, who's plants the child had just trampled down.
 - d. 'Whose that young child?' exclaimed the lady, who's plants the child had just trampled down.

Answer

☐

5. 'I agree in _____ that it is _____ acceptable for pupils to remove their jackets during classes in very hot weather', said the school _____, 'but they must remain _____ at all times.'

In which one of the following do the four words appear in the correct order in which they should be inserted into the above sentence?

- a. principal, quite, principle, quiet
- b. principle, quite, principal, quiet
- c. principal, quiet, principle, quite
- d. principle, quiet, principal, quite

Answer

☐

6. Which one of the following sentences is grammatically correct?

- a. The sisters'-in-law of the bride's cousins made their way into the church.
- b. The sisters-in-law of the bride's cousins made there way into the church.
- c. The sister's-in-law of the bride's cousins made there way into the church.
- d. The sisters-in-law of the bride's cousins made their way into the church.
- e. The sisters-in-law of the brides' cousins made their way into the church.
- f. The sister's-in-law of the bride's cousins made their way into the church.

Answer

☐

7. Quite a _____ of _____ can give
 _____ to other _____, but in
 _____ that _____ is not very _____
 _____, _____ rather as a _____ than
 as a _____.

Insert the 12 words below into their correct position in the above sentence.

shocks most serving animals fish warning highly
 number weapon electric capacity developed

8. Most roots, from branching trees to tiny plants, have large herbs.

Change the position of five words only in the above sentence so that it then makes complete sense.

9. For _____ of _____
 _____ have tried to find _____
 in _____ the _____ of _____
 _____.

Insert the 10 words below into their correct position in the above sentence.

famous hidden people compilers names hundreds
 anagram meanings rearranging years

10. One of the _____ with the use of _____ is that they are _____ only _____ by the _____ who has _____ them and are, thus, not a _____ of _____.

Insert the 10 words below into their correct position in the above sentence.

very understood communication often used means
problems abbreviations effective person

11. Good stone ability is an excellent career success to banking jobs in accounting such as stepping or mathematical.

Change the position of just eight words in the above passage so that it makes complete sense.

12. It is _____ to have, or _____, the _____ to take what at _____ glance may _____ a _____ and, after _____ the _____, _____ at a _____.

Insert the 12 words below into their correct position in the above sentence.

arrive ability seem extremely first problem
complications satisfying difficult solution
unravelling develop

13. Mathematical exercises are necessary puzzles in logic and no Sudoku knowledge is purely in order to solve them.

Change the position of just six words in the sentence above so that it makes complete sense.

14. Words are directly used to relevant topic that are not enclose generally to the main sentence of the brackets.

Change the position of just eight words in the sentence above so that it makes complete sense.

15. The _____, when _____, _____ from its _____ a _____ which _____ into _____ when it _____ in _____ with the _____.

Insert the 12 words below into their correct position in the above sentence.

comes volatile bombardier turns contact posterior
fluid gas attacked air beetle emits

Test four: Advanced verbal aptitude test

This test is a selection of 30 miscellaneous verbal questions designed to measure language use or comprehension, your problem-solving capabilities and your ability to adapt to different types of question.

You have 120 minutes in which to solve the 30 questions.

You should read the instructions to each question carefully before you attempt it.

1. What is wormwood?
 - a. an oil- and vinegar-based salad dressing
 - b. a type of plant
 - c. a mixture from which paper is manufactured
 - d. rotten timber
 - e. tar-based liquid

2. What is plenitude?
 - a. absolute power
 - b. difficulty or distress
 - c. commonplace
 - d. abundance
 - e. a stable period of economic activity

3. DID TRUCE is an anagram of two 'this and that' words, CUT, DRIED (cut and dried). FIRST LOOPS is an anagram of which two other 'this and that' words?

4. DID TRUCE is an anagram of two 'this and that' words, CUT, DRIED (cut and dried). TRAPS SISTERS is an anagram of which two other 'this and that' words?

5.

S		A
E	E	C
I	U	

Start at one of the four corner letters and spiral clockwise round the perimeter, finishing at the centre letter to spell out a nine-letter word. You must provide the missing letters.

6.

N		T
U	E	
	T	A

Start at one of the four corner letters and spiral clockwise round the perimeter, finishing at the centre letter to spell out a nine-letter word. You must provide the missing letters.

7. Which one of the following is not an anagram of a country?

A THIN LAD

ALAS I MAY

OIL A COMB

A NOBLE CAR

BAG HANDLES

8.

U	C	L	A
		O	N
A	T		O

Work from letter to letter horizontally and vertically, but not diagonally, to spell out a 12-letter word. You must find the starting point and provide the missing letters.

9.

S		O	O
E	U	O	T
L		R	

Work from letter to letter horizontally and vertically, but not diagonally, to spell out a 12-letter word. You must find the starting point and provide the missing letters.

10. Change one letter only in each of the words below to produce a familiar phrase.

COLD AS DAY

11. Change one letter only in each of the words below to produce a familiar phrase.

NO TOP CAR

12. A familiar phrase has had the initial letters of each word and its word boundaries removed. What is the phrase?

ITNHEENCE

13. CENTIMETRE POLE is an anagram of which two words that are similar in meaning?

Clue: unabridged

14.

Read clockwise round each circle to find two words that are opposite in meaning. You must find the starting points and provide the missing letters.

15. Only one group of five letters below can be rearranged to spell out a five-letter word in the English language. Identify the word.

- GTOPA
- DICOL
- HWTCA
- ACULT
- TPRON

16. Combine six of the three-letter bits to produce two words that are synonyms.

son ent ify res tor cre per ely rep mis

17. I am moving the part of my anatomy that contains the chief ganglia of the nervous system causing it to come into contact with a structure erected from rectangular blocks. What am I doing?
-

18. The clue LACONIC HEALTH PROFESSIONAL leads to which pair of rhyming words?
-

19. Solve the clues below. The letters XYZ in each word are the same three letters, which is a familiar three-letter word.

X Y Z * * * a cogwheel with a small number of teeth

* X Y Z * * pertaining to the backbone

* * X Y Z * lying on the back

* * * X Y Z a seedling apple

20.

Work clockwise to spell out two eight-letter words that are antonyms. The letters in each word are consecutive, all letters are used once each and each word starts in a different circle. Each word takes one letter only from each circle.

21.

E	S	H		
E	D	A		
A	P	R	R	F
		T	O	O
		N	F	E

Each nine-letter square contains the letters of a word. Find the two nine-letter words that are synonyms.

22. HAIL NOT THE HOUR is an anagram of what phrase (6–4–4 letters long) that means sanctimonious?

23. ERRANT OR LOOSE is an anagram of what phrase (6–2–5 letters long) that means eventually?

24. AGE ABLE PORT

Which is the only word below that shares a certain feature with the three words above?

OPEN WORD TALE END CAN

25. Combine 4 of the 10 bits below to produce a word meaning spy.

con per esd ess eav ric erc ome rop ant

26.

Work clockwise to spell out 2 eight-letter words that are synonyms. The letters in each word are consecutive, all letters are used once each and each word starts in a different circle. Each word takes one letter only from each circle.

27.

H	M	T	A	N	R	H	P	T	H
U	A	E	I	I	I	U	E	O	A
*	*	*	*	*	*	*	*	*	*

Insert a phrase (2–3–5 letters long), meaning definitely or certainly, on the bottom line to complete 10 three-letter words reading downwards.

30. Which letter can be added to a word meaning BLEMISH to produce a word meaning OVERBURDEN?

R T D M

Spatial aptitude

The definition of ‘spatial’ is pertaining to space, and spatial abilities mean the perceptual and cognitive abilities that enable a person to deal with spatial relations.

The questions within such tests typically take the form of a series of shapes or diagrams from which you have to pick the odd one out, identify which should come next in a sequence from a set of alternatives, choose from a set of alternatives the diagram that will complete an analogy or find the missing element in a matrix of figures. The ability being investigated in this type of test is how well a person is able to identify patterns and meaning from what might appear at first glance random or very complex information.

Such tests are referred to as culture-free or culture-fair, and are designed to be free from any cultural bias, so that no advantage is derived by individuals of one culture relative to those of another. In other words, they eliminate language factors or other skills that might be closely tied to one particular culture.

People who possess a high level of spatial aptitude often excel in fields such as architecture, photography, engineering design and decorating, and as artists, carpenters, landscape designers, cartoon animators, guides, fashion designers, shop fitters and civil engineers.

The tests in this chapter are all culture-fair and rely totally on diagrammatical representation. As well as testing your ability to deal with problems in a structured and analytical way, many are also designed to make you think laterally and creatively.

Test one: General spatial aptitude test

Test one consists of 20 questions that will test your general spatial appreciation. As there are several different types of questions within the test, it is necessary to read the instructions to each question before attempting it.

You have 90 minutes in which to attempt the 20 questions.

1. Which is the odd one out?

Answer ☐

2.

Which is the missing circle?

 Answer ☐

3.

Which is the missing section?

 Answer ☐

4.

What comes next in the above sequence?

- A
- B
- C
- D
- E

Answer ☐

5. Which is the odd one out?

Answer ☐

6.

Which is the missing tile?

Answer ☐

7. Which is the odd one out?

Answer ☐

8.

What comes next?

Answer ☐

9. Which is the odd one out?

Answer ☐

10. Which is the odd one out?

Answer ☐

11.

as:

is to:

Answer ☐

12.

Which is the missing tile?

Answer ☐

13.

What comes next?

A

B

C

D

E

F

Answer

14.

Which triangle should replace the one with the question mark?

A

B

C

D

E

Answer

15. Which is the odd one out?

Answer ☐

16.

Which is the missing section?

Answer ☐

17.

Which two symbols should replace the question marks?

- | | | | | |
|---------------------|---------------------|---------------------|---------------------|---------------------|
| <p>A</p> <p>1 2</p> | <p>B</p> <p>1 2</p> | <p>C</p> <p>1 2</p> | <p>D</p> <p>1 2</p> | <p>E</p> <p>1 2</p> |
|---------------------|---------------------|---------------------|---------------------|---------------------|

Answer ☐

18. Which is the odd one out?

Answer ☐

19.

Which is the missing tile?

Answer ☐

20.

Which is the missing section?

Answer ☐

Test two: Logical analysis test

A definition of ‘logical’ is analytic or deductive, and this description can be applied to someone who is capable of reasoning or using reason in an orderly, cogent fashion.

The questions in this test can all be solved using logical analysis. In each question you are given three equations. In each of these the contents of the first two boxes determine the contents of the third box. One of the equations is incomplete and by using the same logic as for the two complete ones you must work out which is the correct box from the five options provided.

Before commencing the test it is recommended that you study the two examples provided.

Example 1

Which is the missing square?

Answer: D

Explanation: The contents of box 1 added to the contents of box 2 equal the contents of box 3.

Example 2

Which is the missing square?

Answer: C

Explanation: The contents of box 1 added to the contents of box 2 equal the contents of box 3. However, when two lines appear in the same position in the first two boxes they do not then appear in box 3. In other words they are cancelled out.

You now have 60 minutes in which to complete the following 10 questions.

1.

Which is the missing square?

Answer ☐

2.

Which is the missing square?

Answer ☐

3.

Which is the missing square?

Answer ☐

4.

Which is the missing square?

Answer ☐

5.

Which is the missing square?

Answer ☐

6.

Which is the missing square?

Answer ☐

7.

Which is the missing square?

 Answer ☐

8.

Which is the missing square?

 Answer ☐

9.

Which is the missing square?

Answer ☐

10.

Which is the missing square?

Answer ☐

Test three: Advanced matrix test

The 10 questions here are designed to test and exercise your appreciation of pattern and design, your ability to think logically and your ability to concentrate and work quickly and analytically under pressure.

In each array of tiles, looking at lines across and down, the first two tiles are combined to produce the third tile, with the exception that like symbols are cancelled out. However, in each array one of the tiles is incorrect and should be replaced with one of the tiles A, B, C, D or E, in order to make the array correct looking both across each row and down each column.

In each question you are required to identify the tile that is incorrect and choose with which of the options, A, B, C, D or E, it should be replaced.

You have 90 minutes in which to solve the 10 questions.

1.

	1	2	3
A			
B			
C			

Looking at lines across and down, if the first two tiles are combined to produce the third tile, with the exception that like symbols are cancelled out, which of the above tiles is incorrect, and with which of the tiles below should it be replaced?

Answer

2.

Looking at lines across and down, if the first two tiles are combined to produce the third tile, with the exception that like symbols are cancelled out, which of the above tiles is incorrect, and with which of the tiles below should it be replaced?

A

B

C

D

E

Answer

3.

Looking at lines across and down, if the first two tiles are combined to produce the third tile, with the exception that like symbols are cancelled out, which of the above tiles is incorrect, and with which of the tiles below should it be replaced?

A

B

C

D

E

Answer

4.

Looking at lines across and down, if the first two tiles are combined to produce the third tile, with the exception that like symbols are cancelled out, which of the above tiles is incorrect, and with which of the tiles below should it be replaced?

Answer

5.

Looking at lines across and down, if the first two tiles are combined to produce the third tile, with the exception that like symbols are cancelled out, which of the above tiles is incorrect, and with which of the tiles below should it be replaced?

Answer

6.

Looking at lines across and down, if the first two tiles are combined to produce the third tile, with the exception that like symbols are cancelled out, which of the above tiles is incorrect, and with which of the tiles below should it be replaced?

A

B

C

D

E

Answer

7.

Looking at lines across and down, if the first two tiles are combined to produce the third tile, with the exception that like symbols are cancelled out, which of the above tiles is incorrect, and with which of the tiles below should it be replaced?

A

B

C

D

E

Answer

8.

Looking at lines across and down, if the first two tiles are combined to produce the third tile, with the exception that like symbols are cancelled out, which of the above tiles is incorrect, and with which of the tiles below should it be replaced?

Answer

9.

Looking at lines across and down, if the first two tiles are combined to produce the third tile, with the exception that like symbols are cancelled out, which of the above tiles is incorrect, and with which of the tiles below should it be replaced?

Answer

10.

	1	2	3
A

C			

Looking at lines across and down, if the first two tiles are combined to produce the third tile, with the exception that like symbols are cancelled out, which of the above tiles is incorrect, and with which of the tiles below should it be replaced?

Answer

Numerical aptitude

We all require some numerical skills in our lives, whether it is to calculate our weekly shopping bill or to budget how to use our monthly income. Mathematical intelligence tests generally explore your ability to reason and to perform basic arithmetic functions.

Numerical (mathematical) intelligence is a strong indicator of general intelligence, as many everyday tasks require arithmetical operations or thought processes even though numbers may not be involved.

Numerical questions are widely used in IQ testing and, as numbers are international, numerical tests are regarded as being culture-fair, or culture-free, and designed to be free from any particular cultural bias so that no advantage is derived by individuals of one culture relative to those of another.

Tests of numerical aptitude are frequently designed to test powers of logic and ability to deal with problems in a structured and analytical way. Such tests enable employers to test the numerical aptitude of candidates and to determine their proficiency and the extent of their knowledge when dealing with numbers, and their ability to apply this knowledge to the solving of mathematical problems.

Good mathematical ability is an excellent stepping stone to career success in jobs such as accounting or banking.

People who possess a high level of numerical skills also often excel in jobs such as auditor, business consultant, financial analyst, mathematics or science teacher, quantity surveyor, tax adviser, company secretary, computer programmer or stockbroker.

Test one: Mental arithmetic

The following is a mental arithmetic speed test of 30 questions, which gradually increase in difficulty as the test progresses.

You should work quickly and calmly and try to think at all times of the quickest and most efficient way of tackling the questions.

The use of a calculator is not permitted in this test, and only the answer should be committed to paper, the object of the test being that all the working out is done in your head.

You have 45 minutes in which to solve the 30 questions.

1. What is 9 multiplied by 8?

Answer:

2. What is 267 divided by 3?

Answer:

3. What is 19 multiplied by 11?

Answer:

4. What is 80% of 160?

Answer:

5. Multiply 12 by 6 and divide by 3

Answer:

6. Divide 42 by 7 and add 13

Answer:

7. What is 60% of 250?

Answer:

8. What is $\frac{5}{6}$ of 360?

Answer:

9. Multiply 18 by 12 and subtract 17

Answer:

10. What is $\frac{9}{8}$ of 200?

Answer:

11. What is 20% of 135 plus 35?

Answer:

12. Multiply 5 by 8 by 3

Answer:

13. Divide 28 by 7 and add it to 15
multiplied by 5

Answer:

14. What is 595 divided by 7?

Answer:

15. Add $28 + 27 + 39 + 18 + 36$

Answer:

16. What is 35% of 150?

Answer:

17. What is 45 multiplied by 19?

Answer:

18. What is $\frac{3}{8}$ of 128?

Answer:

19. What is 1257 less 749?

Answer:

20. Divide 126 by 14

Answer:

21. What is 45% of 120?

Answer:

22. Subtract 869 from 2482

Answer:

23. Multiply 72 by 19

Answer:

24. What is 1000 divided by 16?

Answer:

25. Add $\frac{3}{4}$ of 216 to $\frac{3}{5}$ of 75

Answer:

26. Add 963 to 471

Answer:

27. Multiply 49 by 11

Answer:

28. What is $12/16$ expressed as a decimal?

Answer:

29. Deduct $4/7$ of 49 from 100

Answer:

30. Divide 2682 by 894

Answer:

Test two: Numerical sequence test

In a numerical sequence test it is necessary to identify a pattern that is occurring in the sequence.

The numbers in the sequence may be progressing, or they may be decreasing. In some cases they may be both progressing and decreasing within the sequence, and in some cases two separate sequences may be interwoven. It is up to you to determine which of these is occurring and to continue the sequence by providing the missing number(s) indicated by the question mark(s) in each question.

The use of a calculator is not permitted in this test.

A time limit of 20 minutes is allowed in which to complete the 15 questions.

1.

0, 1, 2, 3, 5, 7, 9, 12, 15, 18, ?

Answer:

2.

3, 6, 12, 21, 33, ?

Answer:

3.

1000, 975, 925, 850, 750, ?

Answer:

4.

1, 10, 2.5, 7.5, 4, 5, ?, ?

Answer:

5.

12, 8.5, 5, 1.5, ?

Answer:

6.

8, 16, 64, 128, 512, 1024, ?

Answer:

7.

12, 11, 9, 6, 2, ?

Answer:

8.

1, 1.5, 3, 7.5, 21, ?

Answer:

9.

2, 6, 9, 27, 30, 90, 93, ?

Answer:

10.

5, 6, 7, 8, 10, 12, 14, 20, ?, ?

Answer:

11.

100, 99, 96, 91, 84, 75, 64, ?

Answer:

12.

19, 38, 57, 76, 95, 114, ?

Answer:

13.

2, 5, 12, 27, 58, 121, ?

Answer:

14.

10, 9.75, 9.25, 8.5, 7.5, 6.25, ?

Answer:

15.

10, 11.75, 9.25, 11, 8.5, ?

Answer:

Test three: Working with numbers

This test is a battery of 20 questions designed to measure your ability to work with numbers and think numerically.

A time limit of 120 minutes is allowed in which to complete the 20 questions. The use of a calculator is permitted in this test.

1.

45	9	5	10	44
2	24	14	4	48
11	18	13	27	6
15	3	15	1	27
12	8	7	36	16

Looking at straight lines horizontally, vertically or diagonally, what number is three places away from itself multiplied by 3, two places away from itself less 3, three places away from itself divided by 2 and two places away from itself less 1?

Answer:

2. Find five consecutive numbers in the list below that total 21.
5823639472165834259423

Answer:

3.

1	3	6	8	11
4	6		11	14
6		11	13	16
9	11		16	19
11	13	16		21

Which is the missing section?

Answer:

4.

9265921753894168972483

Add together all the even numbers in the above list that are immediately followed by an odd number.

Answer:

5.

3297485792457193841825

What is the mean of all the numbers greater than 6 in the list above?

Answer:

6. Insert the numbers listed into the circles so that – for any particular circle – the sum of the numbers in the circles connected to it equals the value corresponding to that circled number in the list. For example:

$$1 = 14 (4 + 7 + 3)$$

$$3 = 1$$

$$4 = 8 (1 + 7)$$

$$7 = 5 (1 + 4)$$

$$1 = 13$$

$$2 = 4$$

$$3 = 8$$

$$4 = 5$$

$$5 = 11$$

$$6 = 9$$

7. Insert numbers into the remaining blank squares so that the sums in each line and column are correct. All numbers to be inserted are less than 10.

	×		÷		=	4
+		-		+		+
	+		+	3	=	
-		-		÷		÷
	-	1	×		=	
=		=		=		=
2	+		÷		=	

8. If Phil gives Jill £20.00 the money they each have is in the ratio 1:3, but if Jill gives Phil £20.00 the money they each have is exactly the same. How much money have Phil and Jill each before they exchange any money?

Answer:

9. What is $\frac{3}{8}$ divided by $\frac{9}{16}$?

Answer:

10.

3	2	5	4
1	0		
4		6	5
2	1	4	3

Which is the missing section?

	3	2
3		

A

	2	3
3		

B

	2	3
2		

C

	3	2
2		

D

Answer:

11.

Multiply the second-highest odd number in the right-hand grid by the second-lowest even number in the left-hand grid.

15	28	13	12	20
29	42	34	58	48
84	64	11	18	27
89	16	36	25	26
17	72	41	61	40

49	11	29	22	61
16	63	47	14	51
53	57	18	37	21
55	19	84	72	59
35	14	81	13	96

Answer:

12.

5	29	7	34
12	16	4	9
20	8	2	11
3	13	6	18

14	12	17	?
8	2	7	3
22	4	19	10
15	6	1	16

Insert the missing number in the right-hand grid so that the 16 numbers in each grid then total the same.

Answer:

13.

Jo's age plus Mo's age is 27;

and Jo's age plus Flo's age is 38;

and Mo's age plus Flo's age is 33.

Therefore, how old are Jo, Mo and Flo?

Answer:

14.

983 : 75

294 : 22

763 : 45

579 : ?

Answer:

15.

2	7
8	6

2	?
7	3

Which number is missing from the right-hand grid so that when multiplied together the product of the four numbers in the left-hand grid is the same as the product of the four numbers in the right-hand grid?

Answer:

16.

		1	= 11
	6		= 15
9			= 19
<u>21</u>	<u>11</u>	<u>13</u>	

Insert the remaining numbers from 1 to 9 in the grid so that adding the numbers across and down gives the column and row numbers outside the grid.

17.

D	B	D	C	31
D	C	B	A	24
A	C	D	C	23
B	B	B	C	23
29	22	32	?	

Each letter represents the same number (ranging between 3 and 10 inclusive). Seven of the resultant row and column totals are given. What is the missing total?

Answer:

18.

What is the value of angle x?

Answer:

19.

Each number is the sum of the two numbers immediately below it in the pyramid. Fill in all the missing numbers.

20. Harry has twice as many as Barry. Altogether they have 207.
How many each have Harry and Barry?

Answer:

Test four: Numerical problem solving

The 15 questions in this test are designed to assess your aptitude at applying your basic mathematical knowledge in order to solve correctly each problem as quickly as possible, and your ability to deal with problems in a structured and analytical way.

The use of a calculator is permitted in this test.

You have 60 minutes in which to answer the 15 questions.

1. Which number is 63 less than 8 times itself?

Answer:

2. A motorist knows four different routes from London to Oxford and three different routes from Oxford to Gloucester. How many different routes does the motorist know from London to Gloucester via Oxford?

Answer:

3. My sister Suzie says that in two years she will be twice as old as she was four years ago. How old is my sister Suzie now?

Answer:

4. Amy visits three stores. At the first store she spends half of her money plus £20.00, at the second store she spends half the money she has left plus £10.00 and at the third store she spends half of what she has left plus £20.00. She is now out of money. How much money did Amy start out with?

Answer:

5. How many minutes is it before 12 noon if 32 minutes ago it was three times as many minutes past 9 am?

Answer:

6. In four years' time the combined age of my three cousins and me will be 208. What will be the combined age in seven years' time?

Answer:

7. Mo, Jo and Flo share out a certain sum of money between them. Mo receives $\frac{5}{8}$, Jo receives 0.25 and Flo receives £7.50. How much is the original sum of money?

Answer:

8. Mary has a budget of £180.00 to spend on her day out. She spends $\frac{5}{9}$ of the £180.00 in the morning, 0.375 of the £180.00 in the afternoon and writes out a cheque for £45.00 in the evening at a restaurant. What is her financial situation at the end of the day?

Answer:

9. How many boxes measuring 1 metre \times 1 metre \times 50 cm can be packed into a container measuring $8 \times 6 \times 6$ metres?

Answer:

10. A market trader received a consignment of eggs and to his dismay found that 175 were cracked, which was 14% of the total consignment. How many eggs were in the consignment?

Answer:

11. The average of three numbers is 29. The average of two of these numbers is 41. What is the third number?

Answer:

12. A train travelling at a speed of 80 mph enters a tunnel that is 2.5 miles long. The length of the train is 0.5 mile. How long does it take for all of the train to pass through the tunnel from the moment the front enters to the moment the rear emerges?

Answer:

13. I travel to work by bus and train. If my bus journey takes 28 minutes and my train journey takes 35 minutes longer, what is the total travelling time in hours and minutes?

Answer:

14. At the Friday morning market a grocer sold 720 items of fruit consisting of a mixture of grapefruit, oranges and pears in the ratio 3 : 4 : 2 respectively. How many of each fruit did the grocer sell?

Answer:

15. Cartons of yoghurt cost 4 pence (£0.04) more if bought individually than if bought in packs of 6. If a pack of 6 costs £2.76, what is the cost of 5 cartons?

Answer:

IQ tests

An IQ (intelligence quotient) test is a standardized test designed to measure human intelligence as distinct from attainments.

Intelligence quotient is an age-related measure of intelligence level. The word ‘quotient’ means the result of dividing one quantity by another, and one definition of intelligence is mental ability or quickness of mind.

Usually, IQ tests consist of a graded series of tasks, each of which has been standardized with a large representative population of individuals in order to establish an average IQ of 100 for each test.

It is generally accepted that a person’s mental age remains constant in development to about the age of 13, after which it is shown to slow up, and beyond the age of 18 little or no improvement is found.

When the IQ of a child is measured, the subject attempts an IQ test that has been standardized, with an average score recorded for each age group. Thus a 10-year-old child who scored the result that would be expected of a 12-year-old would have an IQ of 120, or $12/10 \times 100$.

Since little or no improvement is found after the age of 18, adults have to be judged on an IQ test whose average score is 100, and the results graded above and below this norm according to known test scores.

Like so many distributions found in nature, the distribution of IQ takes the form of a fairly regular bell curve, in which the average score is 100 and similar proportions occur both above and below this norm.

There are many different types of IQ tests. However, a typical test might consist of three sections, with each testing a different ability (usually verbal reasoning, numerical ability and diagrammatic, or spatial, reasoning). In order to give you the opportunity to practise all the types of questions that you are likely to encounter in actual IQ tests, the tests that have been specially compiled for this book are multi-disciplinary and include a mix of verbal, numerical and diagrammatic questions, as well as additional questions involving logical thought processes, together with a degree of lateral thinking.

While it is generally accepted that a person's IQ remains constant throughout their life, and that they are therefore unable to increase their actual IQ, it is possible to improve one's performance on IQ tests by practising the many different types of question and learning to recognize the recurring themes.

The four IQ tests that follow have been newly compiled for this book and are therefore not standardized, so an actual IQ assessment cannot be given. However, a guide to assessing your performance for each test is provided.

A time limit of 120 minutes is allowed for each test. The correct answers are given in Chapter 5 and you should award yourself 1 point for each completely correct answer. Calculators may be used to assist with solving numerical questions if preferred.

IQ test one

1. Which is the odd one out?

Answer:

2. Which word in brackets is closest in meaning to the word in capitals?

SALUBRIOUS (healthy, practical, anaemic, arresting, sad)

3. Place a word in the brackets that has the same meaning as the definitions either side of the brackets.

financial institution () side of river

4.

1, 1, 3, 3, 6, 7, 10, 13, 15, 21, ?, ?

Answer:

5. The call centre received its highest number of enquiries between 3 pm and 4 pm, which was 60% more than the 600 enquiries it received between 2 pm and 3 pm. On average, how many enquiries per minute were received between 3 pm and 4 pm?

Answer:

6.

What number should replace the question mark?

Answer:

7.

4	3	5	4	6
2		3	2	4
3	2		3	5
1		2	1	3
2		3	2	4

Which is the missing section?

1

0

1

A

1

1

0

B

0

0

1

C

0

1

0

D

Answer:

8. INEPT OLD BIRD is an anagram of which two words (4,8 letters long) that are similar in meaning?

Clue: courageous

Answer:

9.

Which is the missing square?

Answer:

10.

S	O	R	T
	T	A	S
	E	R	E

Work from letter to letter horizontally and vertically, but not diagonally, to spell out a 12-letter word. You must find the starting point and provide the missing letters.

Answer:

11. Use each letter of the newspaper headline below once only to spell out the names of three types of fruit.

CHEAP PIRACY TERROR

12. What word can be placed in the brackets so that it forms another word or phrase when tacked on to the end of the first word, and another word or phrase when placed in front of the second word?

SAND () WORK

- 13.

Which hexagon should replace the question mark?

Answer:

14. Which two words are most opposite in meaning?

unsavoury, tawdry, graceful, irksome, undemanding, potent

15.

What number is missing?

Answer:

16. What is the longest word in the English language that can be produced from the letters:

ARPDHLINEF

Answer:

17.

7	9	4	2
6	3	8	1
5	2	6	9
4	7	3	5

6	8		3
7	2	9	
	3	7	8
5	6	2	4

Fill in the three missing numbers.

18. Which of the following is not an anagram of an animal?

- LEG ZEAL
- GAUNT RONA
- THE PANEL
- BULL MARE
- LOG RAIL

Answer:

19.

When the above is folded to form a cube, which is the only one of the following that *cannot* be produced?

Answer:

20.

A B C D E F G H

What letter is two to the right of the letter which is four places to the left of the letter immediately to the right of the letter F ?

Answer:

21.

A	D	H
F		M
J	M	

Which is the missing section?

Answer:

22. In four years' time Angela will be twice as old as Barry and four times as old as Carol. Three years ago Angela was three times as old as Barry. How old are Angela, Barry and Carol now?

23. Which is the odd one out?
mollify, congeal, muffle, macerate, assuage

24.

as:

is to:

Answer:

25. The third digit is two more than the first digit; the fourth digit is two more than the second digit; the second digit is five less than the third digit. Which two numbers below are being described?

3164, 4163, 6387, 1537, 6486, 5739, 2547, 7496, 3456, 5373

Answer:

26.

OLD, FIRM, OFFER, TOMATO

What word comes next, logically, in the above sequence?

verbal, quality, literal, candid, radiant

27.

7	2	3	6
5	6	2	8
3	8	1	9
8	4	4	?

What number should replace the question mark?

Answer:

28. What six-letter word can be placed in the brackets so that it forms another word or phrase when tacked on to the end of the first word, and another word or phrase when placed in front of the second word?

MAIN () LINE

29. Identify two words (one from each set of brackets) that form a connection (analogy), thereby relating to the words in capitals in the same way.

DORMITORY (dine, teach, sleep)

REFECTORY (eat, store, cure)

30.

as:

is to:

Answer:

31.

5 6 3 2 9 7 1 4 2 6 8 3 7 5 9 7 1

Delete all the numbers that appear more than once in the above list; then multiply the remaining numbers together. What is the answer?

32. Place four of the nine three-letter bits together to produce a word meaning *histrionic*.

ama, alo, mel, iac, tic, ive, odr, geo, nal

33. Which is the odd one out?

chord, tangent, hypotenuse, diameter, radius

34.

2, 7, 22, 67, 202, ?

What comes next?

Answer:

35. How many lines appear below?

Answer:

36. quadrangular is to square as annular is to:
clock, circle, year, cubic, figure

37. The ages of a group of people are:

34, 27, 36, 18, 15, 72, 67, 12, 24, 45

What percentage of people in the group are above the average age for the group?

Answer:

38. Which two words that are spelled differently but have the same pronunciation mean:

summit / irritation

Answer:

39.

52	31	66	42
79	?	17	74
48	69	34	58
21	73	83	26

What number should replace the question mark?

Answer:

40. Which four of the five pieces below can be fitted together to form a perfect square?

Answer:

IQ test two

1.

Which is the missing tile?

A

B

C

D

E

Answer:

2. Solve the anagram in brackets (10-letter word) to complete a quotation by Sam Goldwyn.

I had a (NO MALT MENU) idea this morning, but I didn't like it.

3.

3	9	7	4	9	8
1	6	8	7	9	4
2	4	9	3	?	6

What number should replace the question mark?

Answer:

4. velum is to palate as trachea is to: throat, windpipe, larynx, swallow, taste

Answer:

5.

1	4	7
4	3	9

3	7	5
7	5	5

4	?	6
6	8	2

What number should replace the question mark?

Answer:

6.

1864 is to 712

and 3925 is to 514

therefore 4859 is to ?

Answer:

7.

82	?	6
49	36	18
74	28	?

What numbers should replace the question marks?

The link between the three numbers on each line follows the same rule.

Answer:

8. If meat in a river (3 in 6) is T(HAM)ES, can you find a metallic element in the surrounding conditions (4 in 11)?

9.

13	6	11
8	?	12
9	14	7

What number should replace the question mark?

Answer:

10. Identify two words (one from each set of brackets) that form a connection (analogy), thereby relating to the words in capitals in the same way.

WAX (polish, lighten, increase)

WANE (distend, diminish, plummet)

11. What word is missing from the brackets?

ileum (automobile) taboo

elite () porch

12. Mal is one and a third times older than Sal and Sal is one and a third times older than Al. Together their combined ages total a magnificent 222 years. How old are Al, Sal and Mal?

13. Place a word in the brackets that has the same meaning as the definitions either side of the brackets.

small piece of land () conspiracy

14. How tall is a sapling that is 3 metres shorter than a fence that is four times higher than the sapling?

- 15.

Draw the missing tile from the above matrix.

16.

386295

925683

863529

259368

?

What comes next?

Answer:

17. Complete the words so that the two letters that end the first word start the second word and the two letters that end the second word start the third word, etc. The two letters that end the sixth word also start the first word, to complete the circle.

__ P I __

__ T T __

__ N G __

__ I R __

__ I G __

__ N U __

18.

What number should replace the question mark?

Answer:

19. Place a word in the brackets that has the same meaning as the definitions either side of the brackets.

abstain () chorus of a song

20. Which word in brackets is closest in meaning to the word in capitals?

PHLEGMATIC (authentic, unemotional, alert, bourgeois, average)

21.

Which is the missing tile?

Answer:

22. Which is the odd one out?

Answer:

23. If F F the B represents the phrase Fortune Favours the Brave, what phrase is represented by H is the B P?

24.

Which numbers should replace the question marks?

Answer:

25. What word can be placed in the brackets so that it forms another word or phrase when tacked on to the end of the first word, and another word or phrase when placed in front of the second word?

home () mark

26. Which word in brackets is most opposite in meaning to the word in capitals?

SUPPOSEDLY (never, blatant, undoubtedly, allegedly, rarely)

27.

$1\frac{1}{2}, 4\frac{1}{4}, ?, 9\frac{3}{4}, 12\frac{1}{2}, 15\frac{1}{4}$

What number should replace the question mark?

Answer:

28. Which three of the four pieces below can be fitted together to form a perfect circle?

Answer:

29.

Answer:

What number should replace the question mark?

30.

A	B	C	D	E	
F	G	H	I	J	
K	L	M	N	O	
P	Q	R	S	T	
U	V	W	X	Y	Z

What letter is two below the letter immediately to the right of the letter that is three above the letter W?

Answer:

31.

T	U	
A		L
	I	T

Start at one of the four corner letters and spiral clockwise round the perimeter, finishing in the centre square, to spell out a nine-letter word. You must provide the missing letters.

32. Which is the odd one out?

maxim, fable, adage, epigram, proverb

33.

What number should replace the question mark?

Answer:

34.

as:

is to:

Answer:

35.

Which is the missing tile?

A

B

C

D

E

Answer:

36.

100, 93.5, 80.5, 61, 35, ?

What comes next?

Answer:

37. What day and date comes 43 days after Saturday 24 June?

38.

A B C D E F G H

What letter is immediately to the right of the letter that comes midway between the letter two to the right of the letter A and the letter immediately to the left of the letter H?

Answer:

39.

What number should replace the question mark?

Answer:

40. contemplate is to meditate as contrive is to: project, devise, implement, draft, strategy

Answer:

IQ test three

1.

Which is the missing circle?

Answer:

2.

100, 1, 91.5, 9.5, 83, 18, 74.5, 26.5, ?, ?

What two numbers come next?

Answer:

3. Identify two words (one from each set of brackets) that form a connection (analogy), thereby relating to the words in capitals in the same way.

URSINE (rabbit, sheep, bear)

VULPINE (fox, deer, wolf)

4.

What number should replace the question mark?

Answer:

5.

What comes next?

Answer:

6.

Which is the missing tile?

A

B

C

D

E

F

Answer:

7. Only one group of five letters below can be rearranged to spell out a five-letter word in the English language. Identify the word.

KATOC

EFIMO

UNOPF

MEOPT

GULEP

Answer:

8. Place a word in the brackets that has the same meaning as the definitions either side of the brackets.

A single instance or example of something ()
receptacle

9.

1	5	3	9
7	0	1	8
1	2	4	7
9	7	8	?

What two-digit number should replace the question mark?

Answer:

10.

Which is the missing section?

Answer:

11. erg is to work as mach is to: engine, speed, power, force, pressure

Answer:

12.

Insert the missing letter in order to spell out an eight-letter word reading clockwise.

13.

Put the numbers 1 to 5 in the circles so that:

The sum of the numbers 2 and 1 and all the numbers between total 7.

The sum of the numbers 5 and 3 and all the numbers between total 15.

The sum of the numbers 4 and 3 and all the numbers between total 8.

The sum of the numbers 5 and 1 and all the numbers between total 12.

14.

elegant fearless midshipman elliptical hackneyed

Which word below shares a common feature with the five words above?

relaxed, distribute, abdominal, goggles, simulate

15.

Which is the missing tile?

Answer:

16.

5	4	17	8
1	9	2	11

19	?
4	26

What number should replace the question mark?

Answer:

17.

A, AB, ABD, ABDG, ABDGK, ?

Which group of letters comes next?

18. What is the meaning of AMORPHOUS?

- a. lifeless
- b. lovable
- c. harmonious
- d. shapeless
- e. unselfish

Answer:

19.

Which piece below can be fitted to the piece above to form a perfect square?

Answer:

20.

$$7492836 \quad * \quad 89$$

$$* \quad *$$

$$638947 \quad 798$$

$$* \quad *$$

$$74986 \quad * \quad ?$$

What number should replace the question mark?

Answer:

21. If my train journey takes 47 minutes and my taxi journey takes 19 minutes longer, what is my total travelling time in hours and minutes?

22. A familiar phrase has had its initial letters and word boundaries removed. What is the phrase?

SLAINSAY

23. What is the value of:

$$496 \times \left(\frac{384}{768}\right)^2$$

Answer:

24.

	T	
O	O	O
P	I	L

Start at one of the four corner squares and spiral clockwise round the perimeter to spell out a nine-letter word, finishing at the centre square. You must provide the missing letters.

25. In four years' time Sally will be twice as old as she was five years ago. How old is Sally now?

26. Which is the odd one out?

Answer:

27. Change one letter only in each of the words below to produce a familiar phrase.

ON DEAL LINE

28.

What number should replace the question mark?

Answer:

29. Which word in brackets is most opposite in meaning to the word in capitals?

DEPRAVED (elated, cherished, chaste, lascivious, favoured)

30.

as:

is to:

A B C D E

Answer:

31. Place the seven three-letter bits in the correct order to spell out a phrase.

ear, ewa, dis, for, for, med, rne

32.

472	361	589
693	587	142
518	429	?

Which is the missing number?

- a. 627
- b. 981
- c. 498
- d. 367
- e. 352

Answer:

33. Which is the odd one out?

ramble, scurry, trudge, perambulate, march

34.

14	19	5	30	48
11	2	24	6	8
15	21	4	10	16
13	9	39	18	32
3	7	17	12	1

Looking at straight lines horizontally, vertically or diagonally, what number is two places away from itself multiplied by 3, three places away from itself divided by 2 and three places away from itself plus 5?

Answer:

35. What number is three times greater than 60 divided by a quarter?

Answer:

36. If A = 3, B = 4, C = 5 and D = 6, calculate the following:

$$\frac{(A \times C) + (B \times D)}{(A \times B) + (D - C)}$$

Answer:

37. What word can be placed in the brackets so that it forms another word or phrase when tacked on to the end of the first word, and another word or phrase when placed in front of the second word?

man () red

38.

4	5	7	3
8	3	3	9
7	6	9	5
6	9	8	?

What number should replace the question mark?

Answer:

39. Which two words are closest in meaning?

pollinate, fervent, winsome, ecstatic, provoke, feverish

40.

Which box should replace the question mark?

A

B

C

D

E

Answer:

IQ test four

1.

Draw the tile missing from the above matrix.

2.

976 : 684

375 : 225

864 : 512

597 : ?

Answer:

3. Alter one letter only from each word below to produce a familiar phrase.

AT TAR AN ORE CAT TALL

4. Which two words are closest in meaning?

tumult, panoply, remedy, spectacle, contest, barricade

5. If tax is charged at 22% on the first £55,000 and 35% on all income in excess of £55,000, how much tax is charged on an income of £80,000?

Answer:

6.

Which is the missing tile?

A

B

C

D

Answer:

7. 27, 54, ?, 108, 135, 162, 189, 216

What number is missing?

Answer:

8. Combine three of the 10 three-letter bits to produce a word meaning GROUP.

ant, age, ain, ent, mer, ide, our, one, upi, lep

9. Which is the odd one out?

busby, toque, cloche, sabot, biretta

10.

What number should replace the question mark?

Answer:

11. A B C D E F G H

What letter is three to the left of the letter immediately to the right of the letter that is two to the left of the letter G?

Answer:

12. ring is to rung as see is to: sees, seen, say, seeing

13. 369, 121, 518, 212, 427, 303, ?

What three-digit number comes next?

Answer:

14. D F R O I O N D ?

What letter is missing?

Answer:

15. Which is the odd one out?

A

B

C

D

Answer:

16. itinerary is to journey as agenda is to: boardroom, secretary, meeting, programme, minutes

17. Which is the odd one out?
canyon, butte, ravine, gully, gorge

18.

A	C	F	H
D	F	I	K
F	H	K	M
I	K		

Which is the missing section?

N	Q
---	---

A

M	P
---	---

B

M	Q
---	---

C

N	P
---	---

D

Answer:

19.

Draw the missing pentagon in the above sequence.

20. LARGE ROUT is an anagram of which nine-letter word?

21. How many different sized circles appear below?

Answer:

22.

7 3 6

8 9 7

5 2 4

6 7 ?

What number should replace the question mark?

Answer:

23. The time is 24 minutes to the hour on a clock on which the numbers on the face are shown in Roman numerals. Arrange the numerals below in the order in which they appear from the minute hand reading anticlockwise.

XII II IX VI VIII IV

24.

72 (168) 96

35 (1112) 87

52 (610) 18

94 (?) 77

What number should replace the question mark?

Answer:

25. DID TRUCE is an anagram of two 'this and that' words, CUT, DRIED (cut and dried). GIVE INK A LICK is an anagram of which two other 'this and that' words?

Clue: fit and well

26. Which two words are most opposite in meaning?
feted, fractious, calm, genuine, durable, affable
-

27.

What number should replace the question mark?

Answer:

28. Which word means the same as the definitions either side of the brackets?

in good health () waterhole

29.

What number should replace the question mark?

Answer:

30. What word can be placed in the brackets so that it forms another word or phrase when tacked on to the end of the first word, and another word or phrase when placed in front of the second word?

light () book.

31. Prudence is one and a half times older than Patience, and Patience is one and a half times older than Charity. How old are Prudence, Patience and Charity if their combined ages total 133?

32.

as:

is to:

Answer:

33. Place a word in the brackets that has the same meaning as the definitions either side of the brackets.

female deer () posterior

34.

3	8	5
6	2	8
5	6	?
1	7	?
7	4	?

What numbers should replace the question marks?

Answer:

35. Only one group of five letters below can be rearranged to spell out a five-letter word in the English language. Identify the word.

- AHLIN
- WRDCO
- FIONC
- ARWON
- DINCO

Answer:

36.

What number should replace the question mark?

Answer:

37.

3	18	14	?	15	2
22	?	9	10	6	18

What numbers should replace the question marks?

Answer:

38. Identify two words (one from each set of brackets) that form a connection (analogy), thereby relating to the words in capitals in the same way.

LACTIC (vinegar, milk, apples)

CITRIC (vitamin, fruit, acid)

39.

What numbers should replace the question marks?

Answer:

Chapter 2

Test one: General spatial aptitude test

Answers

1. D
The rest are the same figure rotated.
2. A
The long hand moves 90° clockwise at each stage, and the short hand moves 45° anticlockwise.
3. C
The same three symbols are being repeated, starting at the top right-hand corner and working along the top line, then back along the next line, etc.

4. D

The slanting line moves two forward one back, the white dot moves three forward two back, the horizontal line moves two back one forward and the large circle moves two back one forward.

5. B

It contains three white dots and two black. The rest contain three black dots and two white.

6. C

Looking across and down, when two dots of the same colour appear in the same position in the first two squares they are carried forward to the third square, but then change from black to white and vice versa.

7. B

In all the others the same sequence of figures appears. In B the position of two of the figures is reversed.

8. B

A new dot is added until all dots have changed colour (which they do at each stage). The dots then disappear one at a time from the top, still changing colour.

9. C

The remainder are in pairs (A/E and B/D) in which the pattern on the outside is repeated on the inside.

10. D

It is the only one where the dot does not appear in the circle.

11. D

Only when lines appear in the same position in just two of the first three hexagons are they then transferred to the final hexagon.

12. E
Only when two elements appear in the same position in the first two squares, both across and down, are they transferred to the end square.
13. B
A new dot is added to the vertical and horizontal lines at each stage, and the dots appear black/white in turn.
14. D
The dot visits a different corner at each stage working clockwise and alternates black/white.
15. E
The rest are the same figure rotated.
16. C
The dots are moving from corner to corner so that in each line across and down they appear in four different corners.
17. D
Each connected line of four circles contains the four different symbols.
18. 12
All the rest are in identical pairs but with black/white reversal: 1/9, 2/10, 3/5, 4/14, 6/13, 7/11, 8/15.
19. E
Look at each line across and down. One small circle is empty; one contains a horizontal line and one a vertical line. One large circle is empty; one contains a horizontal line and one a vertical line. One square is empty and the other two contain opposite diagonal lines.
20. B
Each row across and down contains a line in each of the four different positions.

Assessment

Score 1 point for each correct answer.

<i>Total score</i>	<i>Rating</i>	<i>Percentage of population</i>
19–20	Genius level	Top 5%
17–18	High expert	Top 10%
15–16	Expert	Top 30%

11–12	Middle average	Top 60%
9–10	Low average	Bottom 40%
7–8	Borderline low	Bottom 30%
5–6	Low	Bottom 10%
0–4	Very low	Bottom 5%

Test two: Logical analysis test**Answers**

1. D
The contents of box 1 plus the contents of box 2 equal the contents of box 3.
2. D
The contents of box 1 plus the contents of box 2 equal the contents of box 3.
3. C
The contents of box 1 plus the contents of box 2 equal the contents of box 3.
4. C
The contents of box 1 plus the contents of box 2 equal the contents of box 3.

5. A
The contents of box 1 plus the contents of box 2 equal the contents of box 3. However, like dots are cancelled out.
6. A
The contents of box 1 plus the contents of box 2 equal the contents of box 3. However, only lines that are common are carried forward.
7. E
The contents of box 1 plus the contents of box 2 equal the contents of box 3. However, when the same-colour dot appears in the same position in boxes 1 and 2 it changes from black to white and vice versa.
8. C
The contents of box 1 plus the contents of box 2 equal the contents of box 3. However, lines that are common are cancelled out.
9. B
The contents of box 1 plus the contents of box 2 equal the contents of box 3. However, lines that are common are cancelled out.
10. C
The contents of box 1 plus the contents of box 2 equal the contents of box 3. However, when a particular square or circle is common to both these boxes it changes from a square to a circle and vice versa.

Test two: Numerical sequence test

Answers

- 22
Add 1, 1, 1, 2, 2, 2, 3, 3, 3, 4.
- 48
Add 3, 6, 9, 12, 15.

3. 625
Deduct 25, 50, 75, 100, 125.
4. 5.5, 2.5
There are two interwoven sequences: starting at 1 add 1.5; starting at 10 deduct 2.5.
5. -2
Deduct 3.5 at each stage.
6. 4096
 $\times 2$, $\times 4$ repeated
7. -3
-1, -2, -3, -4, -5
8. 61.5
The amount added on is multiplied by 3 each time, ie 0.5, 1.5, 4.5, 13.5, 40.5.
9. 279
 $\times 3$, +3 repeated.
10. 19, 36
There are two interwoven sequences: starting at 5 add 2, 3, 4, 5; starting at 6 add 2, 4, 8, 16.
11. 51
Deduct 1, 3, 5, 7, 9, 11, 13.
12. 133
Add 19 each time.
13. 248
 $\times 2+1$, $\times 2+2$, $\times 2+3$, $\times 2+4$, $\times 2+5$, $\times 2+6$
14. 4.75
-0.25, -0.5, -0.75, -1, -1.25, -1.5
15. 10.25
+1.75, -2.5, +1.75, -2.5, +1.75

Assessment

Score 1 point for each correct answer.

<i>Total score</i>	<i>Rating</i>	<i>Percentage of population</i>
14–15	Genius level	Top 5%
13	High expert	Top 10%
11–12	Expert	Top 30%
10	High average	Top 40%
8–9	Middle average	Top 60%

Test three: Working with numbers**Answers**

- 4
- 72165
- C
Looking across, the numbers progress +2, +3, +2, +3.
Looking down, they progress +3, +2, +3, +2.
- 36
- 8
 $72 \div 9$

6.

7.

3	×	8	÷	6	=	4
+		-		+		+
2	+	3	+	3	=	8
-		-		÷		÷
3	-	1	×	3	=	6
=		=		=		=
2	+	4	÷	3	=	2

8.

£60.00	£100.00	originally
£40.00	£120.00	Phil to Jill
£80.00	£80.00	Jill to Phil

9. $\frac{2}{3}$
 $\frac{3}{8} \times \frac{16}{9}$

10. A

11. 1008
 16×63

12. 41
Total 197

13. Jo 16, Mo 11, Flo 22

14. 44

$$(5 \times 7) + 9$$

15. 16

$$\text{Product} = 672$$

16.

7	3	1
5	6	4
9	2	8

17. 18

$$A = 3, B = 6, C = 5, D = 10$$

18. 35°

The three angles in a triangle always total 180° .

$$\text{Angle } y = 180 - (70 + 55) = 55$$

Angle $z = 90^\circ$ (a right angle)

The three angles on a straight line = 180° .

$$\text{Therefore angle } x = 180 - (55 + 90).$$

19.

20. Harry = 138, Barry = 69

Assessment

Score 1 point for each correct answer.

<i>Total score</i>	<i>Rating</i>	<i>Percentage of population</i>
19–20	Genius level	Top 5%
17–18	High expert	Top 10%
15–16	Expert	Top 30%
13–14	High average	Top 40%
11–12	Middle average	Top 60%
9–10	Low average	Bottom 40%
7–8	Borderline low	Bottom 30%
5–6	Low	Bottom 10%
0–4	Very low	Bottom 5%

Test four: Numerical problem solving

Answers

1. 9
 $9 \times 8 = 72; 72 - 63 = 9$
2. 12
 4×3
3. 10
 $10 + 2 = 12$
 $10 - 4 = 6$
4. She starts with £240.00
 First store $240 - (120 + 20) = 100$
 Second store $100 - (50 + 10) = 40$
 Third store $40 - (20 + 20) = 0$
5. 37 minutes
 $12 \text{ noon} - 37 \text{ minutes} = 11.23$
 $11.23 \text{ less } 32 \text{ minutes} = 10.51$
 $9 \text{ am plus } 111 \text{ minutes } (37 \times 3) = 10.51$
6. 220
 Now $208 - (4 \times 4) = 192$
 In seven years' time $192 + (4 \times 7) = 220$
7. £60.00

Mo $5/8$	= 37.50
Jo 0.25	= 15.00
Flo	7.50
	60.00

8. Minus £32.50

$$£180 \times 5/9 = £100.00$$

$$£180.00 \times 0.375 = £67.50$$

$$\text{Cheque} \quad \quad \quad £45.00$$

$$£212.50$$

9. 576 boxes

Capacity of box = 288 cu metres ($8 \times 6 \times 6$)

Each box = 0.5 cu metres ($1 \times 1 \times 0.5$)

10. 1250

$$(175 \div 14) \times 100$$

11. 5

$$3 \text{ numbers} = 29 \times 3 = 87$$

$$2 \text{ numbers} = 41 \times 2 = 82$$

The third number must, therefore, be 5 ($87 - 82$).

12. 2 minutes 15 seconds

$$(2.5 + 0.5) \times \frac{60}{80}$$

13. 1 hour 31 minutes

$$28 + 28 + 35$$

14. 240 grapefruit, 320 oranges and 160 pears

$$720 \div 9 (3 + 4 + 2) = 80$$

$$\text{grapefruit} = 3 \times 80 = 240$$

$$\text{oranges} = 4 \times 80 = 320$$

$$\text{pears} = 2 \times 80 = 160$$

$$720$$

15. £2.50

A pack costs £2.76 or £0.46 each in the pack. If bought individually they cost £0.50 (4 pence more).

$$£0.50 \times 5 = £2.50$$

Assessment

Score 1 point for each correct answer.

<i>Total score</i>	<i>Rating</i>	<i>Percentage of population</i>
14–15	Genius level	Top 5%
13	High expert	Top 10%
11–12	Expert	Top 30%
10	High average	Top 40%
8–9	Middle average	Top 60%
7	Low average	Bottom 40%
5–6	Borderline low	Bottom 30%
3–4	Low	Bottom 10%
0–2	Very low	Bottom 5%

Chapter 4

IQ test one

Answers

1. A
The dot and shaded portion are each in three circles. In the rest they are in two.
2. healthy
3. bank
4. 21, 31
There are two interwoven sequences. Start at the first 1 and add 2, 3, 4, 5, 6. Start at the second 1 and add 2, 4, 6, 8, 10.
5. 16 per minute
Between 2 pm and 3 pm 600 enquiries were received. There were 60% more between 3 pm and 4 pm, ie 960, which is 16 (960/60) per minute.
6. 12
The numbers in each segment plus the number in the circle attached to it always total 20, ie $5 + 3 + 12 = 20$, $3 + 7 + 10 = 20$, etc.
7. A
Looking across numbers progress $-1, +2, -1, +2$. Looking down they progress $-2, +1, -2, +1$.
8. bold, intrepid
9. B
Looking across and down, only circles that are common to the first two squares are carried forward to the end square. However, they then change from black to white and vice versa.

10. stratosphere

11. apricot, pear, cherry

12. paper

13. E

The contents of each hexagon are determined by the contents of the two hexagons immediately below it. Lines from these two hexagons are carried forward to the hexagon above, except when two lines appear in the same position, in which case they are cancelled out.

14. tawdry, graceful

15. 9417

Numbers are in pairs where the digits swap round ABCD/CBDA, ie 7491/9417, 7183/8137, 2639/3692, 5826/2865.

16. philander

17.

7	9	4	2
6	3	8	1
5	2	6	9
4	7	3	5

6	8	5	3
7	2	9	0
4	3	7	8
5	6	2	4

Looking from the left square to the right square, the odd numbers are -1 and the even numbers $+1$.

18. BULL MARE = umbrella

The animals are gazelle (LEG ZEAL), orang-utan (GAUNT RONA), elephant (THE PANEL) and gorilla (LOG RAIL).

19. A

20. E

21. B

Looking across, progress three letters in the alphabet then four letters. Looking down, progress five letters then four.

22.

	Now	+4 years	-3 years
Angela	24	28	21
Barry	10	14	7
Carol	3	7	

23. congeal

It means to harden; the rest are to soften.

24. C

The two sets, when added together, produce three complete circles.

25. 4163 and 7496

26. quality

Each word commences with the last letter of the previous word plus two places in the alphabet, and each word increases by one letter in length.

27. 2

The number formed by the second two digits in each line is half of the number formed by the first two digits, eg 72/36.

28. stream

29. sleep, eat

30. C

Superimpose the two figures and change circles to crosses and vice versa.

31. 32

32. melodramatic

33. hypotenuse

It is the line in a triangle; the rest are lines in circles.

34. 607

$\times 3 + 1$ at each stage

35. 12

36. circle

37. 40%

Average age is 35 ($350/10$)

38. peak / pique

39. 27

Alternate numbers in each column total 100.

40.

Assessment

Score 1 point for each correct answer.

<i>Total score</i>	<i>Rating</i>	<i>Percentage of population</i>
37–40	Genius level	Top 5%
32–36	High expert	Top 10%
28–31	Expert	Top 30%
24–27	High average	Top 40%
17–23	Middle average	Top 60%
13–16	Low average	Bottom 40%
9–12	Borderline low	Bottom 30%
5–8	Low	Bottom 10%
0–4	Very low	Bottom 5%

IQ test two

Answers

1. E

Lines continue from adjacent squares. However, continuous lines become broken and vice versa.

2. monumental

3. 3

$397 \times 2 = 794$, $249 \times 2 = 498$, $168 \times 2 = 336$, ie the numbers formed by the first three digits on each row are half the value of the numbers formed by the last three digits on each row, albeit in the wrong order.

4. windpipe

5. 9

$62 \times 8 = 496$; similarly $49 \times 3 = 147$ and $75 \times 5 = 375$

6. 917
 $4 + 5 = 9$ and $8 + 9 = 17$
7. 16 in both lines
 $7 \times 4 = 28$ and $2 \times 8 = 16$
8. env(iron)ment
9. 10
So the total of each line across, down and corner to corner is 30.
10. increase, diminish
11. helicopter
It is an anagram of elite porch, and automobile is an anagram of ileum taboo.
12. Al 54, Sal 72, Mal 96
13. plot
14. 1 metre
fence = 4 metres
- 15.

Each line contains a heart, spade and club with one of the symbols inverted.

16. 638952
Reverse the fifth and fourth digits; then take the remaining digits in order from right to left.
17. alpine, nettle, length, thirst, stigma, manual

18. 5

$$(6 + 14 + 10) \div 6$$

19. refrain

20. unemotional

21. C

Only circles common to the first two squares in each line across and down are carried forward to the final square. However, they then change from white to black and vice versa.

22. E

In all the others a black dot is inside a figure with an odd number of sides and a white dot is inside a figure with an even number of sides.

23. Honesty is the Best Policy

24.

In the first circle opposite segments total 12, in the second circle they total 14 and in the third circle they total 16.

25. land

26. undoubtedly

27. 7

Add $2\frac{3}{4}$ each time.

28.

29. 21

Divide each number in the corner by 7 and add to obtain the number in the centre.

30. S

31. ultimatum

32. fable

It is a story; the rest are sayings or proverbs.

33. 9

$$39^2 = 1521$$

34. D

One is a mirror image of the other.

35. E

Looking across and down, add the white dots in the first two squares to obtain the number of white dots in the final square. For the black dots, subtract.

36. 2.5

The amount deducted increases by 6.5 each time: 6.5, 13, 19.5, 26, 32.5.

37. Sunday 6 August

38. F

39. 228
 $(9 + 3) \times 19$

40. devise

Assessment

Score 1 point for each correct answer.

<i>Total score</i>	<i>Rating</i>	<i>Percentage of population</i>
37–40	Genius level	Top 5%
32–36	High expert	Top 10%
28–31	Expert	Top 30%
24–27	High average	Top 40%
17–23	Middle average	Top 60%
13–16	Low average	Bottom 40%
9–12	Borderline low	Bottom 30%
5–8	Low	Bottom 10%
0–4	Very low	Bottom 5%

IQ test three

Answers

1. A

The line moves 45° at each stage and alternates straight/curved. The dot moves on the line top/middle/bottom and back again.

2. 66, 35

There are two interwoven sequences. Start at 100 and deduct 8.5. Start at 1 and add 8.5.

3. bear, fox
4. 8
The number at the top is the square root of the number formed by the two digits at the bottom, ie $\sqrt{81} = 9$.
5. E
The number of circles decreases by one each time, and one circle at each stage does not contain a dot.
6. F
Looking both across and down, lines are carried forward from the first two squares, except when two lines are in the same position in these two squares in which case they are cancelled out.
7. MEOPT = tempo
8. case
9. 24
Looking across and down, the final number in each row and column is the sum of the first three numbers.
10. B
The left half of the complete array is a mirror image of the right half.
11. speed
12. educator
13. 52413 or 31425
14. distribute
They all contain a body part: e(leg)ant, f(ear)less, mids(hip)man, el(lip)tical, hackn(eye)d, dist(rib)ute.

15. A

Looking across and down, the white dot moves one corner clockwise at each stage. Looking across, the black line moves 45° clockwise and the dotted line 90° anticlockwise. Looking down, the black line moves 45° anticlockwise and the dotted line 90° clockwise.

16. 5

$19 + 26 = 45$; similarly $5 + 9 = 14$ and $17 + 11 = 28$

17. ABDGKP

Miss an extra letter in the alphabet each time:
ABcDefGhijKlmnoP.

18. d

19. A

20. 6897

Start at 7492836 and working anticlockwise reverse each number and omit the smallest digit.

21. 1 hour 53 minutes (113 minutes)

22. as plain as day

23. 124

$$384/768 = 1/2; 1/2^2 = 1/4; 496 \times 1/4 = 124$$

24. portfolio

25. Sally is now 14.

26. D

It contains the letters T V W X Y, which omits the letter U.
The rest contain five consecutive letters of the alphabet.

27. in real life

28. 4

$$(4 \times 16) \div (2 \times 8)$$

29. chaste

30. C

Every section is divided into two halves by a horizontal line.

31. forewarned is forearmed

32. d

367: so that each row and column contains the digits 1 to 9
once each only.

33. scurry

It is a form of running. The rest are forms of walking.

34. 2

35. 720

36. 3

37. kind

38. 8

The sum of the numbers in each line across increases by 4.

39. fervent, ecstatic

40. A

Each row and column of three boxes contains two of each of the three different lines, ie horizontal, vertical and diagonal.

Assessment

Score 1 point for each correct answer.

<i>Total score</i>	<i>Rating</i>	<i>Percentage of population</i>
37–40	Genius level	Top 5%
32–36	High expert	Top 10%
28–31	Expert	Top 30%
24–27	High average	Top 40%
17–23	Middle average	Top 60%
13–16	Low average	Bottom 40%
9–12	Borderline low	Bottom 30%
5–8	Low	Bottom 10%
0–4	Very low	Bottom 5%

IQ test four

Answers

1.

Each line across and down contains a complete line top and bottom, a broken line left and right and a black dot.

2. 485

$$5 \times 97$$

3. as far as one can tell

4. panoply, spectacle

5. £20850

$$22\% \text{ of } £55000 = £12100$$

$$35\% \text{ of } £25000 = £8750$$

$$\begin{array}{r} \hline £80000 \end{array} \quad \begin{array}{r} \hline £20850 \end{array}$$

6. B

Each line and column contains one each of the four different lines.

7. 81

Add 27 each time.

8. entourage

9. sabot

It is footwear; the rest are headwear.

10. 26

$$(7 \times 8) - (5 \times 6)$$

11. C

12. seen

13. 336

It is the three times table split into groups of three numbers:
3, 6, 9, 12, 15, 18, 21, 24, 27, 30, 33, 36.

14. K

The words FOOD and DRINK are spelled out by alternate letters.

15. B

In all the others, diagonally opposite segments have the same arrangement of lines.

16. meeting

17. butte

It is a hill; the rest are ravines or valleys.

18. D

Looking across, miss one then two letters of the alphabet.
Looking down, miss two then one.

19.

Add another triangle at each stage with its base on a different side of the pentagon working clockwise.

20. regulator

21. 5

22. 2
 $6 \times 7 = 42$
23. VI, IV, II, XII, IX, VIII
24. 1611
 $9 + 7 = 16$ and $4 + 7 = 11$
25. alive and kicking
26. fractious, affable
27. 37
Divide each number in the corner by 2 and add to obtain the number in the centre.
28. well
29. 4
 $(8 + 4) \div 3$
30. year
31. Charity 28, Patience 42, Prudence 63
32. D
The projecting point moves to the opposite inside position.
The dots move to the other end of the line and change from black to white and vice versa.
33. hind
34. 7
3
9
Reverse the numbers and add 1.
35. WRDCO = crowd
36. 41
 $(7 \times 8) - 15$

37.

The numbers produce two sequences as indicated above, ie:
3, 6, 9, 12, 15, 18
22, 18, 14, 10, 6, 2

38. milk, fruit

39. 4
7

Looking at adjacent numbers in the larger sections, $7 - 3 = 4$
and $8 - 1 = 7$.

40. SUNDAY
MONDAY

The sequence progresses miss one day and then miss two
days alternately.

Assessment

Score 1 point for each correct answer.
